

## Job Posting Research

**Job #1:** <https://www.recursionpharma.com/jobs/?id=1276118>

What: Machine Learning Intern

Where: Salt Lake City; 15 minute drive.

When: Anytime between now and the end of the year

How: Not sure what their tech stack is, but am fairly confident that I would be able to learn the needed skills.

Day-to-Day: Looks like there is a chance that I will be working on my own or with others. This depends on my skill-set, and the company needs, both of which would be learned about in the job or in the interview process.

**Job #2:**

<https://www.indeed.com/viewjob?jk=adcaa729376a88da&tk=1df9g2jo6f7th803&from=serp&vjs=3>

What: Data Scientist

Where: American Fork, 15 minute drive.

When: Currently open.

How: Can work with python, matlab, and some experience with spark.

Day-to-Day: I think that this role would be supported, but they are looking for a self-starter more than anything.

**Job #3:**

<https://www.indeed.com/viewjob?jk=34fbae5359436345&q=machine+learning&l=Utah&tk=1df9g4megf7th802&from=web&vjs=3>

What: Autonomous Systems & A.I. Developer Intern

Where: Holladay, UT

When: Currently open

How: Have experience with Tensorflow, as well as python.

Day-to-Day: It's most likely a collaborative initiative. I would work jointly with other machine learning scientists to accomplish that task at hand.
